I count this thing to be grandly true,
That a noble deed is a step towards God,
Lifting the soil from the common clod,
To a purer air, and a broader view.

We rise by things that are under our feet, By what we have mastered of good and By the pride depressed and the passion And the vanquished ills we hourly meet.

We hope, we aspire, we resolve we trust,
When the morning calls us to life and
light,
But our hearts grow weary, and ere the
night
Cur lives are trailing the sordid dust.

Wings for the angels, but feet for men! We may borrow the wings to find the

way—
We may hope, and resolve, and aspire, and pray.
But our feet must rise or we'll fall again. Only in dreams is the ladder thrown
From the weary earth to the sapphire

walls; But the dreams depart, and the vision And the sleeper wokes on his pillow of stone.

Heaven is not reached at a single bound;
But we build the ladder by which we rise
From the lowly earth to the vaulted skies,
And we mount to its summit round by round
—J. G. Holland.

GRANT SPEAKS.

His Imperial Wrath With Garfield and Friendship for Conkling.

General Grant, accompanied by Mrs. Grant, Fred Grant and his wife and Miss General Grant, acci-apanied by Mrs. Grant, Fred Grant and his wife and Miss Sharpe, arrived here yesterday moraing. Owing to the poor health of Mrs. Grant, the general will remain until Wednesday, when he will proceed directly to New York. To a Morning News represents we he said: "I have accomplished the purpose for which I went to Mexico, having obtained all that I went for without any great difficulty, despite the attempts of certain newspapers and persons to create opposition through talk of annexation, etc., etc. The articles were published by the Chicago papers and copied into those of Mexico, and at first aroused a little opposition, but I went before congress and in a short speech told them what I wanted, and they gave me my charter at once. No charter war ever before issued in so short a time. The road will be in all about 700 miles long, running from the City of Mexico through Pueblo to the Pacific coast, while another branch must go down to the gulf. It will be of great benefit to Mexico in developing the resources of that country and to the United States. The charter provides for the completion of the road in ten years, but in all probability it will be finished inside of three years. Four surveying parties are already at work. I shall very likely return there next winter.

In regard to the situation of affairs in

irn there next winter.
In regard to the situation of affairs in bany, Mr. Grant said : "If you want to know what I think of "If you want to know what I think of the manner in which Conkling has been treated by the president and by his colleagues in the senate I will tell you without any hesitancy. I think it is most outrageous, and if you want to know where I stand in the present contest, I will tell you that I am with Conkling and Platt. Conkling is my friend. He has been a warm supporter of mine, but for all that I do not owe him near so much to-day as Garfeid. It is true

but for all that I do not owe him near so much to-day as Garfield. It is true Conkiling did not supper Garfield in the Chicago convention, the saved him in November. Without New York State Garfield could not have been elected, and without Conkling New York State would not have gone republican. Whenever the State has gone republican in the past years the cause could be traced to Conkling and his personal efforts.—When I say that Garfield owes more to Conkling than I do, I do not mean to under estimate the obligations that I am under to him, but I was elected once without the State of New York, and when it did go for me I would have been elected without it. When Conkling went to Warren and commenced his vigorous campaign for the republican party, Garfield matters looked very serious. A defear was almost certain. It was then and then only that the republican defeat was almost certain. It was then and then only that the republicans took heart, and from that time on the battle turned. Conkling went into the campaign because he desired the autoess of his party, not because of any trade he had made with Garfield. It was in accordance with resolutions which he had offered in the national convention pledging the support of every delegate to the candidates nominated, whoever they might be. This was done because several had declared that if I was nominated they would bolt. In regard to the Mentor treaty of which we have heard zo much there was not a word of truth in the sensational reports that were published concerning what occurred during our visit. We were in the State apeaking, and in compliance with Mr. Garfield's oft repeated requests determined to call at Mentor, as it could be done without putting us much out of our way. Conkling and that he would go with me. Arriving at Garfield's house we found a crowd of people there, probably 150 in all. We went into the house and sat down and talked with Garfield and others present, but not a word was naid by either Conkling or noyalf to Garfield in the way of a trade or bargain, nor was any understanding of any kind whatever arrived at. All that we said while with Garfield was in a general way, and could be heard by shoes around us could not hear. All this talk about the Mentor treaty is mere nonesuse. I have no doubt but that when Conkling resigned, the cild so with the intention of keeping out of politics and out of the senate, and I think he acted wisely. He was also and disgusted with the condition of affairs; he had been insulted by the president and slighted by the senate. There is or should be a great deal in senate and slighted by the senate. There is or should be a great deal in senate and slighted by the senate. There is or should be a great deal in senate and slighted by the senate. There is or should be a great deal in senate the approval of the two senators from that State the matter ends there and the nomination rejected. If the republicant senate is a such. I at the first place it was a cealitie. I know have the president from

do it, too. They may beat him through the mans resorted to, but they can nover carry New York State without him. The contest will, in all probability, be carried over to another se

carried over to another session."

Respecting what he had asked of the administration, the general said:
"After Garfield was elected, he wrote me several letters filled with protestations of gratitude at what he chose to call my valuable services during the campaign, and asked me to give him a chance to repay in part the great detthe thought he owed. He said he wanted my assistance and the benefit of my travels and experience, in making his selections for foreign appointments. I finally wrote him that my brother-inlaw, Cramer, was sick and wanted to get out of Denmark, and asked for his transfer to some place south, naming Spain, out of Denmark, and asked for his transfer to some place south, naming Spain, Belgium and Portugal. He was sent to Switzerland. But you see it was all a part of a plan. General Badeau was known to be a friend of mine. He was sent to Denmark in order to make a place for Merritt. Merritt wus appointed to the New York custom house because he was known to be an enemy of Conkling and for the purpose of breaking the latter up. Failing in this, Robertson, a still greater enemy, was selected to complete the work, and it was of course necessary to provide for Merritt, hence these changes; but it is not likely that I would ask for any transfer that would endanger the son of my old Secretary of State. Esh resigned it is true, but it was because he wanted to be promoted."

— A man who is very rich now was very poor when he was a boy. When asked how he got his riches, he replied: "My father taugnt me never to play until my work was finished, and never to spend money until I had earned it. If I had but half an hours work to do in a day, I must do that the first thing, and in half an hour. After this was done I was allowed to play. I early formed the habit to which I now owe my prosperity."

- Some Milwrukes people ask the appointment of fraale police officers. Well, a pretty woman could capture slmost anybody.

- In several counties in Kentucky the blue grass, clover and timothy crops are almost unprecedented.

- Society never finds out that a wo-man is lovely and accomplished until her husband becomes rich. - The Young Men's Christian Asso-ciation of Mobile, Alabama, has 419

North Carolina has 221 Masonic lodges at work with a membership of 8,199.

- Virginia expects to raise the best peach crop made in several years.

# HEADQUARTERS

## MACHINERY

For the counties of Abbeville, Anderson, Oconce. Pickens, Greenville and Laurens.

Steam Engines, Steam Power Presses, Cotton Gins, Feeders & Condensers.

HE above cut represents the HALL SELF-FEEDING COTTON GIN, man-If above cut represents the HALL SELF-FEEDING COTTON GIN, manufactured at Sing Sing, New York, which has been sold in all of the above-named Counties, and which has given entire satisfaction wherever used. The saws are made of the best imported steel. The saw shaft is the largest made. An examination of other Gins will convince you it is the most substantially built Gin in use. It never breaks the will, and therefore does away with the expense of the revolving head, as the secret of making the Gin to prevent its breaking the roll is in the proper shape of the roll-box. It is the only Gin that runs successfully with the Feeder and Condenser attached, and the only Gin that will feed yellow cotton. Below I give you a few testimonials and names: Lewis C. Clinkscales, Abbeville; A. J. Stringer, J. W. Poore, Belton, W. M. Shirley, S. R. Timms, John D. Kelly, Basil Callaham, and many others:

Brewerton P. O., Laurens Co., August 6, 1880.

Mr. John E. Peoples, Anderson, S. C.—Sir: The 60-Saw Hall Cotton Gin, Feeder and Condenser we bought of you last Fall is a perfect success in every respect. We run it by steam, and gin 10 bales of 450 lbs. per day with ease. It is the best constructed and finest finished Gin I ever saw. It gins faster, makes a better sample, and thus far excels in turnout any Gin ever used in this part of the country. This can be proved by all the people who have had cotton ginned by me. We ginned for the public last Fall 600 bales, and give the best satisfaction of all the ginners. The seed being so perfectly clean, it makes a better sample. Further, it separates from the seed cotton, before going into the roll-box, rocks, grit, nails and matches. There is less danger from fire, owing to the Self-Feeder taking out all hard substances before they come in contact with the saws. The cotton picked by the Gin the last season was carefully weighed before it was picked and after being baled, and the average yield the season through was 1 lb. of lint for every 22 lbs, of seed cotton. I have used since the war Gins of four different makes. Yours makes a better litt, cleans the seed better, gins much faster, and for its simplicity unsurpassed. I think it is destined, in a great measure, to supersede all others. I heartily recommend it to those who wish to purchase Gins. It will more than repay the additional Cost.

KNIGHT & BALENTINE.

KNIGHT & BALENTINE.

Belton, S. C., May 4, 1881.

Mr. John E. Peoples, Anderson, S. C.—Dear Sir: Your favor of the 30th of April received, and in reply I have to say that after a very late start I ginned 150 bales of cotton on the Hall Self-Feeding Cotton Gin. Everything has worked well, and the whole outfit has given entire satisfaction, both to my customers and myself. I would not think of running a Gin without the Feeder and Condenser. The Feeder does better work than possibly can be done by hand. Both the Feeder and Condenser are indispensable.

Yours truly,
JOSEPH D. PINSON.

Appropriate 1881 — John E. Peoples, Agent Hall's Gin—Sir: The

ANDERSON, S. C., May 7, 1881.—John E. Peoples, Agent Hall's Gin.—Sin: The 40-Saw Hall Gin, made at Sing Sing, N. Y., bought of you last Fall, has given perfect satisfaction. It cleans the seed well, and makes a superior lint, and runs light. The saw shaft and saws are the best I ever saw.

L. H. WELBORN.

To J. E. Peoples—The 50-Saw Hall Gin, Feeder and Condenser I bought from you last Fall beats any Gin I have ever seen, and I have used and tried four different kinds. It runs light, makes a good sample, gins fast, and will surpass any Gin in making a good turnout and in cleaning the seed. Now, if you desire a good Gic, try the Hall Gin, Feeder and Condenser, made at Sing Sing, N. Y. The Feeder and Condenser can't be beat, as the Feeder will feed any kind of cotton—wallow or description.

ANDERSON, S. U., May 18, 1881.—John E. Peoples, Anderson, S. C.—DEAR SIR: The 60-Saw Hall Gin, Feeder and Condenser, made by Hall S. F. Cotton Gin Co., Sing Sing, N. Y., bought of you last Fall, has given perfect satisfaction to myself and customers. I have used the Emery, Star and Needle Gins, and much prefer the Hall to either of them. I ginned last season upwards of 400 bales cotton on the Hall Gin, and during the whole season the Gin, Feeder and Condenser did not give me an hour's deisy. I can cheerfully recommend it to any one wishing to purchase a Gin. I found no dimently in ginning yellow cotton, as the Feeder feeds yellow cotton, and takes out all grit and hard substances before it comes in contact with the saws.

WM. A. NEAL.

Andreson, S. C., April 30, 1881.— John E. Peoples, Anderson, S. C.—Dear Sin: The 80-Saw Hall Gin, Feeder and Condenser, made at Sing Sing, N. Y., bought of you last Fall, beats anything of the kind that I have ever used, and I have used several different makes of Cotton Gins. It is the best Gin in use for durability, lightness of draft, cleaning the seed perfectly, and never breaks the roll, and gives entire satisfaction to myself and customera. I was burnt out the 25th of last September, and my customers waited one mounth on me until I could get another Hall Gin to gin their cotton. This car be proven by my neighbors. The Feeder and Condenser can't be beat. I have never had any trouble with them.

Yours truly,

M. A. COBB.

PIERCETOWN, S. C.—Mr. J. E. Peoples, Anderson, S. C.—Dear Siz: The 50-Saw Self-Feeding Hall Cotton Clin, with Condenser attached, made at Sing-Sing, N. Y., purchased of you last Fall has given entire satisfaction. It saves the labor of one hand, and feeds more regularly than could be done by hand, never breaking the roll for a day at a time if attended to. I ginned 350 bales last Fall with it, and it is may good order appearantly as ever. It makes samples to compete with any other gin. Mr. Sanford Martin had a bale ginned on my gin last Fall that was pronounced by the Piedmont Manufacturing Company to be the best ever brought to that market.

D. H. HAMMOND.

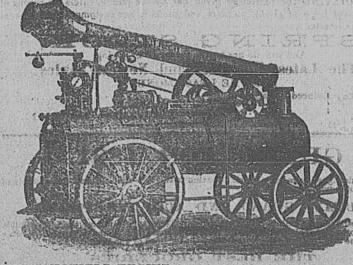

Duz Wilson, S. C., July 24, 1880.—Mr. J. E. Peoples.—Dean Sin: In answer to your postal I will say that the Hall Self-Feeding Cotton Gin, made at Sing-Sing, N. Y., that I bough of you has given entire satisfaction. I ginned nine bales a day weighing 450 lbs. Cleans the need perfectly and makes a superior sample of lint. I want no better for speed and lightness of draft. Only wish I had taken an 80-saw instead of a 60-saw.

Yours truly,

7. L. HADDON.

Anderson, S. C., May 14, 1881.—Ino. E. Peoples, Anderson, S. C.—The Hall Gin manufactured at Sing-Sing, N. Y., and purchased of you last season, is the best constructed and finest finished gin we have ever used. It runs light, never chokes or breaks the roll, and for sample cannot be excelled by any gin ever used in this section. It has given this neighborhood entire satisfaction, and in our opinion is equal to or better than any other gin in use to our knowledge, and would advise any one wishing to purchase a good gin to buy the Hall Gin in preference to any other.

MARTIN & DUCKWORTH, Williamston, S. C.

THE SCHOFFELD ENGINE, which has been sold in every section of the Sorthern States, and which has given such universal satisfaction, will be kept on hand, and sold at prices that will compete with any first-class Engine manufactured. The following testimonials will give an evidence of its arperior simplicity, durability and

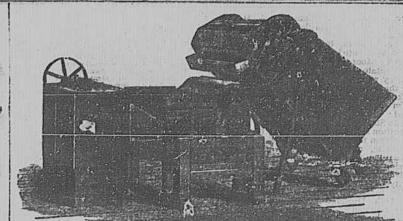

power:

Ambreson, S. C., May 6, 1881.—John E. Peoples—Dear Sir; The Schould Engine purchased of you—six-horse nower—has given perfect satisfies ion. It is the best Engine I have ever used, and I have used three other different makes. I like it for three remons. Ist. It is simple and durable. End. It runs smoother and steadier than any Engine in our country. Srd. It has more power than any Engine made to the humber of horse-

PRESCRIONE. S. C.—Mr. J. E. People.—Dear Sir.: The five-horse power Schoffold Enverse purchased of you fast Fall has given satisfaction. My engineer says it is the lightest ming Engine be ever had suything to do with. Can keep up more beam with lead of these say offer. He may also have that Contener attached he all these and contener attached he all these and given have been day.

Amprison, S. C., April 2, 1881.—To J. E. Peoples. The six-horse Schoffeld Enginee nearly and any ordinary man can run it without any trouble. I am running a 40-inchener Eaw Mill, and have saved as high as 3000 feet in one day out of old field pines—logs twing very small. It has more power than any 6-horse Engine I ever saw, recruitly recommend this Engine to all who desire an Engine. It can be best and to poth running.

Samples of the above Machinery can be seen by calling at my Store, and par desiring to purchase will find it to their interest to call on or confer with me by JOHN E. PEOPLES, Agent, Anderson, S. C.

#### DANIEL PRATT GIN COMPANY GIN, FEEDER and CONDENSER.

THIS is the 50th year of the Daniel Pratt Cotton Gin Business, during which time they have manufactured over 22,000 Gins, which are used in every cotton-growing State in the Union, in Mexico, South America, British East Indies, and in almost every other

This is the 50th year of the Daniel Pratt Cotton Gin Business, during which time they have manufactured over 22,000 Gins, which are used in every cotton-growing State in the Union, in Mexico, South America, British East Indies, and in almost every other country where cotton is grown.

The Revolving Head placed in the end of the cotton-box prevent the Gin from choking and the roll from breaking. Any common plantation hand being able to feed the Gin seisfactorily. The Feeder is superior to any other machins of the kind in use. They are simple in construction, and easily managed. They stand upon the floor, and are therefore not so hard to get at. The Condenser is equal to any in use—we believe superior to any now made. The lower end of the cylender being open, all dirt from the linit is driven through the floor by the air from the gin-brush. By the use of this Condenser the lint-room can be entirely done away with, saving many doliars in the construction of buildings, making the labor of handling the cotton before packing far easier, and loss and damage by fire is reduced to a minim un. The Feeder and Condenser will pay for themselves in one season. Every machine is fully warranted to do perfect work, and until the purchaser is fully satisfied with the machine we do not ask for payment. Should any machine prove in any way defective, we make the same good at our expense, upon notice being given to us. We give the names of gentlemen in this and adjoining Counties who have the Dariel Pratt Gins, Feeders and Condensers in use, and refer the public to them, believing that their recommendation of the machines will be more satisfactory to any one desiring to purchase than the ordinary stereotyped form so common:—

WALKER & LOUD,

No. 135 Meeting Street, West Side,
Near Charleston Hotel, Charleston, S. O.

April 7, 1881

PERRY, HOUSTON CO. GA., Jan. 23, 1829.

In the year 1873, there were two negro prisoners confined in the jail of this county, who were very hadly afflicted with that loathsome disease Syphilis. Its my official capacity as Ordinary, I employed Capt. C. T. Swift, then a resident of this place, to cure theza, under a contract, mo cure, no pay." He administered to them his celebrated Syphilitis Specific, and in a few weeks I felt bound, under my contract, to pay him out of the county tressary, as he had effected a complete and radical cure.

In testimony I hereunto set my official signature of the county tressary, as he had effected a complete and radical cure.

Ordinary Houston County, Ga. CHATTANGOGA, TENS., Feb. 14, 1879.

We take pleasure in saying that the S. B. E. is giving good estisfaction. We have had excellent esults from a number of cases. One goniteman, who had been confined to his hed at receks with Syphillite lineumatism, has been cured entirely, and speaks in the highest praise of it. It also sets well in primary as in secondary and tertiary cases.
